

# Session: Impact and Adaptation

- [Background] GHG mitigation actions are essential to realize a decarbonized world, but actions related to adaptation will also be needed to ensure sustainable decarbonization.
- [Basic purpose of the session] To share the most recent ADAPTATION policies (planning and implementation) at national or sub-national scale in each country

# Session: Impact and Adaptation

- Dr. Céline Phillips (ADEME, France): French multi-level governance of climate change adaptation
- Prof. Rizaldi Boer (IPB, Indonesia): Integration of Climate Change Adaptation and Mitigation into Development Plan
- Dr. Yasuaki Hijioka (NIES, Japan): Japan's Experiences for Climate Change Adaptation
- Dr. Taehyun Kim (KACCC, Korea): KACCC's Experiences for Climate Change Adaptation in the Republic of Korea
  - (20 minutes talk & 5 minutes Q&A)

# General Discussion

- What are the (missing) factors or conditions that are important for accelerating adaptation implementation?
- For supporting and realizing the implementation of proper adaptation, what kind of international cooperation/coordination are needed?
- Are there any experiences on adaptation policies of other countries to be shared among the participants in the session?
