BASIC's Perspective: communiqué of the 8th Ministerial Meeting, 25-27 August, 2011

- AWG-KP:
 - Quantified emissions targets for Annex B parties in Kyoto 2nd round and comparable efforts by Annex I parties not in Annex B
 - Deepening of commitments towards 2°C
 - No gap between Kyoto 1st and 2nd rounds
 - Continuity of CDM and flexibility mechanisms
 - Concern about “migration” of Annex B parties from KP to AWG-LCA

BASIC's Perspective: communiqué of the 8th Ministerial Meeting, 25-27 August, 2011

- Implementation of Cancún decisions and solving of pending issues from Cancún:
 - NAMAs registry
 - Adaptation
 - REDD+
 - Technology centers and network
 - Green Fund – timely disbursement and interim committee under orientation of AWG-LCA
 - MRV of QELROs (A.I) and NAMAS (non-A.I)
 - MRV of financial commitments (100 bi USD)
 - Concern about dangers of unilateralism

Experts' Perspective: Cross-Cutting Questions

- Current status of LCS research

Mitigation cost curves, NAMAs portfolio

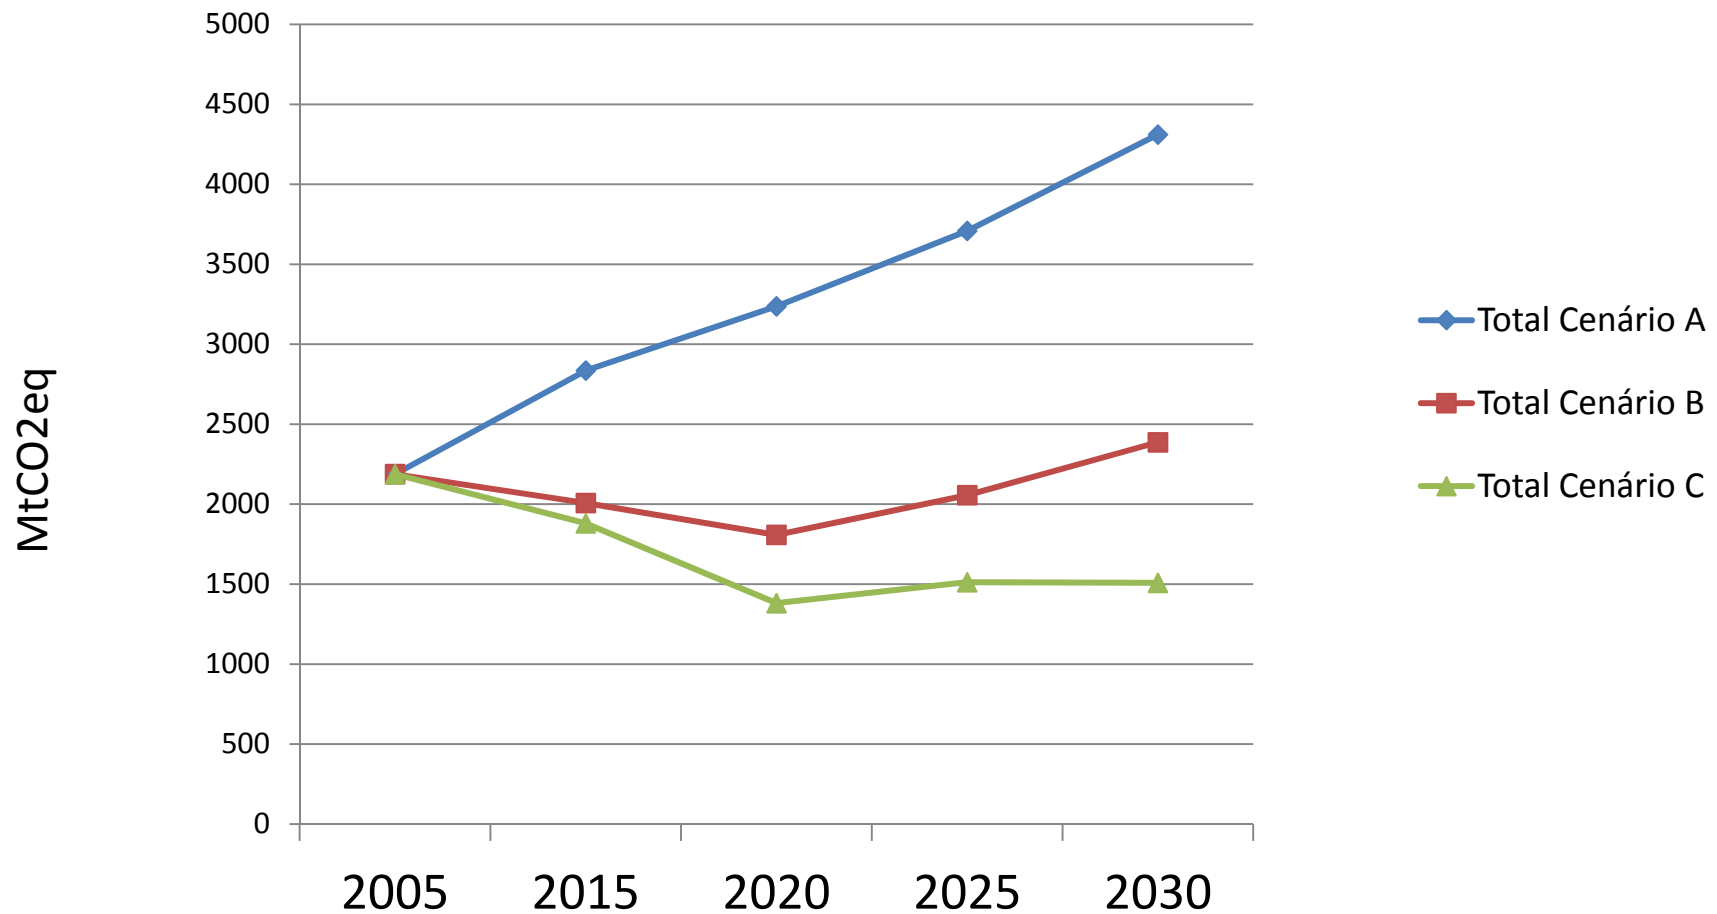

- Research gaps and challenges / desires:

Social and economic implications of mitigation scenarios (employment, income distribution, growth rate)

- How translate the results of the LCS research into policy and society?

Science/Policy Dialogue

Three Emission Scenarios in Brazil up to 2030 : BAU, NAMAs up to 2020 and Additional Mitigation Actions

2050 Emission Projections in Brazil with NAMAs up to 2020
