

WORKSHOP ON A SYSTEMATIC AND QUANTITATIVE DESIGN OF LOW CARBON DEVELOPMENT PLAN IN CAMBODIA

LOW CARBON RESEARCH NETWORK IN CAMBODIA

22ND APRIL 2013

Mr. HAK MAO

TABLE OF CONTENT

- I. LCS AND LCS-RNET DEFINITION
- II. LCDS AND LCS-RNET IN CAMBODIA
- III. LOW CARBON RESEARCH
NETWORK(LCS-RNET) IN CAMBODIA
- IV. ESTABLISHMENT AND ENHANCEMENT
OF LCS_RNET IN CAMBODIA

I. LCS AND LCS-RNET DEFINITION

- 
- ❑ **Low-Carbon Society (LCS)** will serve as a guiding principle and strategy to turn the challenges of today into opportunities so that Cambodia can make headway towards sustainable economic growth and environmental sustainability.
 - ❑ **Low Carbon Society Research Network (LCS-RNet)** is a tool to promote and encourage the dialogues and close cooperation among policy makers, researchers, and other stakeholders, including businesses and citizens to work together to ensure sustainable economic development, environmental sustainability and capacity improvement.

II. LCDS AND LCS-RNET IN CAMBODIA

- ❑ What does it mean by Low Carbon Development Society (LCDS)?

A Low-Carbon Society (LCS) Development refers to the development of an economy which has a minimal output of GHG emissions into the atmosphere.

- ❑ Why does Cambodia need LCS?

The concept of LCS is considered the important economic development tool for socio-economic development in Cambodia.

III. LOW CARBON RESEARCH NETWORK IN CAMBODIA

IV. ESTABLISHMENT AND ENHANCEMENT OF LCS_RNET IN CAMBODIA

The following concepts shall be considered:

- ❑ Building human resources through providing training and fellowship for the Government officers, Research institutes and Academia
- ❑ Building climate change research center in Cambodia with development partner support;
- ❑ Seeking and providing sufficient budget support for LCS-RNet and LCS research activities;
- ❑ Providing opportunity to researchers to study (Master/Doctoral Degree) in Japan or other countries;
- ❑ Bringing researchers and students from Cambodia to visit Japan's research institutes and universities as well as other relevant institutions for exchanging experience and knowledge; and
- ❑ Mobilizing resources for LCS implementation and other climate change related projects from potential donors.
