

Deep Decarbonisation of Materials Processing Industries

Save
the Date
**10 Nov
2017**

Being home to more than 10 per cent of Europe's energy intensive industries, North Rhine-Westphalia (NRW) faces demanding challenges for the implementation of the Paris Agreement: The ambitious goal is to limit global warming well below 2° Celsius. Under the theme **“Deep Decarbonisation of Materials Processing Industries - NRW as a pioneer for climate-friendly production of basic materials”**, the State of NRW together with the Wuppertal Institute and the EnergyAgency.NRW invites interested parties to an international one day conference aside the **COP 23** in Bonn on **10 November 2017** from **10 to 17.30**. Amongst others, Dr. Reinhold Achatz, CTO ThyssenKrupp AG, and Prof. Dr. Manfred Fishedick, Vice-President of the Wuppertal Institute, will be expected on the podium.
