

## *Tripartite Climate Policy Dialogue among China and Japan and Korea*

The Republic of Korea, China and Japan have a major presence in global climate policy development. Especially, the climate policy of China will be one of the critical factors to determine the global trajectory of greenhouse gas emissions. Bringing together the knowledge and experiences that the three countries have accumulated at various levels, the three countries could contribute to the transformation to low-carbon and climate resilient societies in Asia and across the entire globe. In order to share our knowledge and experience, research institutes in each country jointly make presentations on an international cooperative framework called "Japan-China-Republic of Korea Tripartite Climate Policy Research Forum".

**Date & Time: 4 December 2015, 10:00-12:00**

**Venue: Korean Pavilion**

Co-Organized by

Institute for Global Sustainability (IGS), Yonsei University, Republic of Korea (ROK)

Energy Research Institute (ERI), People's Republic of China (PRC)

Institute for Global Environmental Strategies (IGES), Japan

### **Opening Remarks (15 mins.)**

- Mr. Seong-kyu Yoon, Minister, Ministry of Environment, ROK
- Dr. Hoesung Lee, Chairman, IPCC

### **Special Keynote Speech (15 mins.)**

- Dr. Seung-soo Han, Special Envoy for Disaster Risk Reduction and Water to UN Secretary General and Former Prime Minister, ROK

### **Presentations by Principal Researchers (40 mins.)**

- China: Dr. Dadi Zhou, Energy Research Institute, PRC (*tbc*)
- Japan: Dr. Hamanaka, Chairman, IGES, Japan
- Korea: Prof. Tae Yong Jung, IGS, Yonsei University, ROK

### **Panel Discussion (40 mins.)**

- Moderator: Prof. Tae Yong Jung, IGS, Yonsei University, ROK
- China: Dr. Dadi Zhou, Energy Research Institute, PRC (*tbc*)
- Japan: Dr. Hironori Hamanaka, Chairman, IGES, Japan
- Dr. Rae Kwon Chung, Principal Advisor, UN EOSG
- Dr. Changmo Sung, President, Green Technology Center, ROK

### **Q & A Session (10 mins)**
